INFORMATION

Dear colleagues, mechanics, machine-builders and interested persons,

We are happy to inform you that the conference is dedicated to 10 years of nanotechnologies development in Republic of Moldova.

The Conference is organized by financing through the project named: "Enhancing the capacities of the ELIRI Research Institute in applied research to enable the integration of Moldova in the European Research Area on the basis of scientific excellence" (MOLD-NANONET, Grant agreement no: 294953)

The main goal of the International Conference is to consolidate researchers, experts, and company leaders of different countries to promote further development of nanotechnology under the global economics which is constantly changed. This development is based on coordination in different countries and regions through special complex programs implementation, recommendations, and information supply, protection of the rights and interests of its members.

The following sections will be proposed for the conference:

- 1. Nano-structures and nano-particles**
- 2. Nano-technology in precision mechanics**
- 3. Nano-film technology of and nano-wires**
- 4. Nano-technologies in bio-medicine**
- 5. Nano-technologies and robot technique**
- 6. Nano-sensors**

Papers presented and accepted for participation at the conference will be published in journal "Physics and Technics: Processes, models, experiments"
